PROFESSIONAL USE GUIDELINES ⑤

APPLICATION:

Apply with any equipment that delivers an even spray mist to the soil. Water-in as soon as possible after application.

RATE OF APPLICATION:

Apply at the rate of 10 - 20 L/ha every 14-21 days.

COMPATIBILITY:

Spike is tank mix compatible with many systemic fungicides, insecticides, and nutrient solutions. **Spike** contains a very high solids content and therefore needs to be shaken intensely to ensure a homogeneous mixture. For best mixing results, remove tank strainer prior to product addition.
