

## BALL MARK DEFENSE

THE BEST DEFENSE IS A GOOD OFFENSE

*Ball marks are the result of a shot played onto the green. How turf responds before, during, and after a ball mark is an indicator of turf strength. Defend your greens with a Floratine Turf Action Plan.*

### ■ TURGIDITY

*Turgor* for exceptional ball mark resistance through patented siloxane.

### ■ CELL STRENGTH

*Trical 35-SP* is immediately available calcium providing cellular strength and turgidity.

### ■ WEAR RESISTANCE

*Quad K* provides immediately available potassium to optimize vascular nutrient transport.

*The Proper Way to Repair a Ball Mark*

- 1** Use a prolonged ball mark repair tool (preferably), knife, key or tee.
- 2** Insert at the edges of the mark—not the middle of the depression.
- 3** Bring the edges together with a gentle twisting motion, but don't lift the center. Try not to tear the grass.
- 4** Smooth the surface with a club or foot. You're done when it's a surface that you would putt over.
