

THATCH REDUCTION

ALLOW THE SOIL TO BREATHE

Turf needs air and water, but thatch build-up minimizes the availability of both. Break down the thatch to release nutrients and increase the movement of air and water.

■ REDUCE THATCH

Thatch Buster is a cellulase enzyme product designed to accelerate the decomposition of cellulase.

■ PENETRATE THATCH

Pervade is a specially designed wetting agent for penetrating tough thatch layers.

■ ENCOURAGE MICROBES

Grofax 33 is a nutritional supplement for microorganisms to promote their proliferation for keeping thatch levels optimal.
